PROJECTS

OneFlow - Plan to Bill in One Place

Nov 2025

Hackathon Project

- Developed a full-stack MERN workflow management platform for project planning, task management, timesheet tracking, and billing operations.
 - Implemented secure **JWT authentication** and **role-based access control (RBAC)**, enabling protected access and user-specific dashboards.
 - Built project and task management modules, allowing managers to create projects, assign tasks, and monitor team progress efficiently.
 - Developed timesheet, invoice, expense, and vendor bill management features, streamlining financial operations and billing workflows.
- Designed responsive React.js interfaces and scalable RESTful APIs with MongoDB and Express.js, while providing analytics dashboards for project and financial insights.

Tech Stack: MongoDB, Express.js, React.js, Node.js, Tailwind CSS, JWT, REST APIs, Git, GitHub.

Smart-EDU - Education Management Platform

March 2025

Hackathon Project

- Developed a web-based education management platform for efficient course, student, and learning resource management.
- Built a scalable backend using **Node.js, Express.js, and MongoDB**, ensuring reliable data storage and retrieval.
- Designed and implemented **RESTful APIs** with complete CRUD functionality for managing courses, students, and educational resources.
- Created a responsive and user-friendly interface using **HTML, CSS, and JavaScript**, improving accessibility across devices.

Tech Stack: Node.js, Express.js, MongoDB, JavaScript, HTML, CSS, REST APIs.
